

07.1-1333 Determining fuel consumption by driving on road

Preceding work:

Operation no. of operation texts and work units or standard texts
and flat rates: 07-1333

- 1 With car standing on even ground, fill up fuel tank in the presence of customer.
- 2 Test distance approx. 100 km, approx. 40 km of which on freeway (motorway) and approx. 60 km normal highway with city traffic.
- 3 After the test run, fill up fuel tank again and calculate fuel consumption.

Example:

Fuel consumption in litres/100 km

$$= \frac{\text{Quantity of fuel consumed in litres}}{\text{distance driven in km}} \times 100$$
