

A. Warnings and safety precautions for lead acid batteries

P54-8561-59

(1) Fire, sparks, naked flames and smoking prohibited:

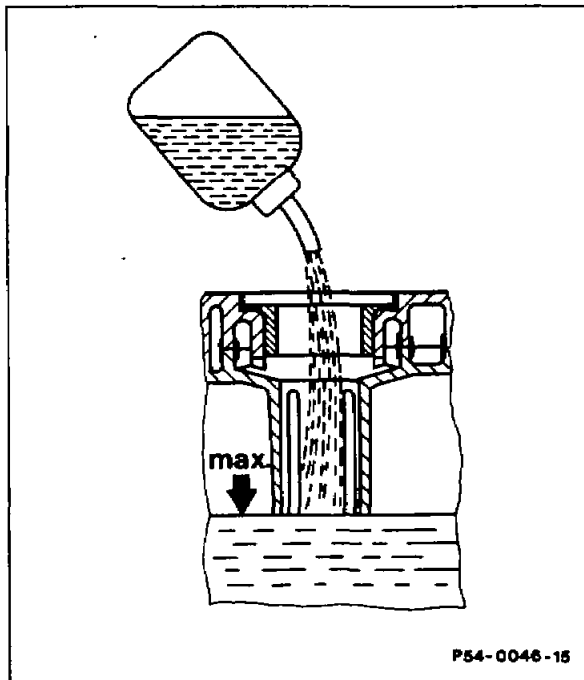

- Avoid sparks when handling cables and electrical equipment.
- Avoid short circuits.

- (2) Wear eye protection.
- (3) Keep acid and batteries away from children.
- (4) **Risk of explosion:**
 - A highly explosive gas mixture is produced when charging batteries.
- (5) Pay attention to the instructions on the battery, in the instructions for use and in the Owner's Manual of the car.
- (6) **Risk of burns:**
 - Battery acid is extremely caustic.
 - Wear protective gloves and eye protection.
 - Do not tilt battery as electrolyte may flow out of the vent openings.
- (7) **First aid:**
 - If acid splashes into your eyes, rinse out immediately with clear water for several minutes. Then, consult a doctor without delay.
 - If acid splashes onto your skin or clothing, neutralize immediately with acid converter or soap suds and wash out with plenty of water.
 - If acid is swallowed, consult a doctor without delay.
- (8) **Warning note:**
 - Do not expose batteries unprotected to direct daylight.
 - Discharged and faulty batteries may freeze up; always store in frost-free place.
- (9) **Disposal:**
 - Dispose of old batteries at an official collection point.
 - Do not tilt batteries when transporting.
 - Never dispose of old batteries in domestic refuse.

B. Filling the battery

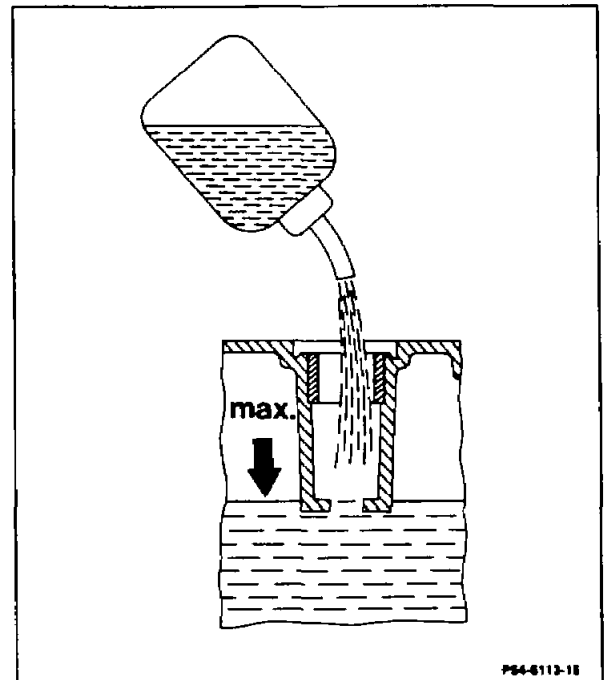

Pay attention to warning notes and safety precautions (section A).

Version A

Cell caps
 Electrolyte
