

## 97-750 Sealing compounds for bodies

---

### Attention!

For sealing jobs on our bodies, only the following sealing compounds may be used.

### MB universal sealing compound (black)

Tube, 225 g                      Part no. 003 989 01 71

For sealing rubber sleeves, cable passages, as well as welding seams and overlaps. Also for sealing glued-in glass.

Curing time	approx. 24 hours
Shelf life	approx. 12 months at 5 to 20 °C/41 to 68 °F
Cleaner	benzine

MB universal sealing compound is also suitable for glueing glass, metal wood, fabric, cardboard and the like.

Close opened nozzle tip of cartridge after use with MB sealing cord. This will prevent early drying out.

### MB body sealing compounds

(can be painted over)

Cartridge, 310 ml                      Part no. 001 989 63 20

For weld seams, overlaps and the like.  
Can be painted over after drying.

Shelf life	approx. 6 months
Cleaner	benzine <b>no paint thinner or liquids containing alcohol</b>

An open cartridge will last only a few days and should be used up immediately, whenever possible.

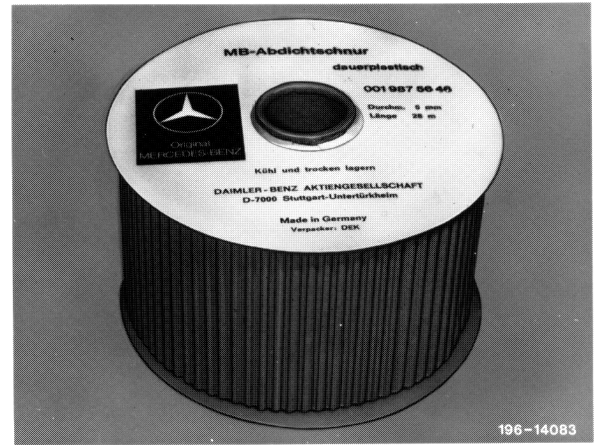

### **MB sealing cord (5 mm dia., black)**

---

Spool, 28 m

Part no. 001 987 56 46

As shim between body parts.

### **MB glass sealing compound**

(can be dabbed off, black)

---

Cartridge, 310 ml

Part no. 001 989 31 20

For sealing window between rubber and glass as well as between rubber and body.

Upon drying, dab off excess material with adhesive tape. Close opened nozzle tip with MB sealing cord.

### **MB window sealant (grey)**

---

Economy package,

855 ml

Part no. 000 989 98 85

For sealing window on T-model between rubber and glass as well as between rubber and body.

No curing time, permanently resilient.

Shelf life

approx. 6 months  
at 10-25 °C

Cleaner
